CV is a diversified trade services group dedicated to delivering the edge in technical services and visual solutions. The team provides a broad range of complementary offerings across our four businesses:

- Electrical Construction
- Infrastructure Services
- Asset Services
- Media & Signage

We have an unwavering commitment to a clearly defined set of values, exceptional customer service and the ongoing development of our 700+ team. In everything we do, we seek to deliver the edge with great people, great systems and great customers.

CV has developed a long standing and loyal customer base by consistently delivering quality work. Our customers include Government bodies, large corporate clients, a host of residential and commercial builders, a broad range of critical infrastructure facilities and major infrastructure projects.

The CV team is passionate about great customer service and is committed to delivering you the edge by always:

- Putting safety first
- Understanding and respecting your priorities
- Communicating openly to ensure there are no surprises
- Delivering quality outcomes

“As founders and owners of CV, it’s more than a business to us. Whilst we have grown large enough to handle even the biggest jobs, we’re still small enough to care about every project, for every customer, every time.

A set of core values drives the CV team; putting safety first, acting with integrity, working as a team, being accountable and seeking balance in our work and home lives. By living these philosophies, we ensure that we can create a legacy that our people and our customers are proud of.”

Andrew McMaster
Managing Director

Ed Phelan
Non-Executive Director

ELECTRICAL CONSTRUCTION

With a history spanning more than 30 years, our Electrical Construction team prides itself on delivering quality outcomes to our valued customers.

With approximately 200 team members, it is one of the largest businesses of its kind in Queensland, operating across locations in Brisbane, Sydney, the Gold Coast, the Sunshine Coast and Townsville.

Our team delivers electrical design and construct services across a broad range of sectors including industrial, commercial, government, multi-level residential projects and project housing.

Committed to industry leading customer service, we ensure that our promises are always met, our processes and systems exceed industry benchmarks, and the right resources are assigned to every project.

Design and Construction

Developers and builders can access a full electrical construction solution – electrical design and certification, management of projects from concept planning, through to design and building approval, construction and completion.

Housing

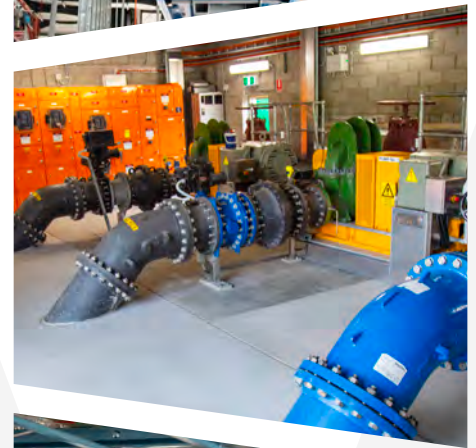

Our project housing customers have access to a full range of electrical installation services including house wiring, air conditioning, solar, home automation and maintenance. Completing around 1,000 homes per year, our dedicated housing team has the experience and expertise to deliver on time and on budget, every time.

Data Installation and Communications

We deliver communications and data, installations, security and access control solutions to a variety of customers in the industrial and commercial sectors.

Industrial

CV provides a full range of electrical services for the industrial sector in areas including water and wastewater treatment, sewage treatment, instrumentation services, food and beverage, and control and automation.

INFRASTRUCTURE SERVICES

Our qualified and experienced Infrastructure Services team handles projects ranging from major highways and road infrastructure, commercial and industrial projects, airport and airfield works to urban developments and subdivisions.

We understand the complexity of large scale alliance projects and work closely with designers, engineers and management to ensure every project is delivered on time and fully meets your specifications and expectations.

Urban Development

Our team has demonstrated capability in delivering URD works including construction of underground reticulation for urban, rural and industrial subdivisions, and large customer connections.

Large Customer Connections (LCC)

We provide a full design and construction service for customers with substantial load requirements - over 1MVA.

Private HV

Providing a complete design and construction for HV infrastructure, we ensure the electrical supply is tailored for each individual project.

Airports

We have an in depth understanding of the unique challenges that arise from working in airport environments. Over the past two decades, the team has developed proven systems and capability in airport infrastructure to mitigate risk and ensure successful project completion.

Roads and Rail

With a proven track record in transport infrastructure, our team's experience in ITS, road lighting and traffic signals provides our clients with the capability to successfully deliver on their road and rail projects.

Design

Our team delivers a fully certified and qualified electrical planning and distribution design service.

ASSET SERVICES

With a diversified skill set, the Asset Services team provides our customers with an integrated trades solution to optimise the operations and management of their assets and facilities. Delivering to a broad range of customers, we are experienced in providing maintenance solutions to critical infrastructure including airports, ports, defence facilities, hospitals and schools.

Integrated Solution

We provide an integrated solution including preventative and reactive maintenance, and minor project and refurbishment works in the following areas:

- Electrical
- Building
- Plumbing and Pumping
- Fire Services
- HVAC
- Security

CV prides itself on being easy to do business with, through open communication channels. When time is critical, we have the capability to deliver services 24 hours a day, 7 days a week, with quick response time frames tailored to the customer's needs.

Our success is defined by your success, delivered through proven ability to understand your facilities and assets, and the impact our activities have on your operations and customers.

MEDIA & SIGNAGE

Tailoring the right signage, with the right creative, in the right location for your needs.

CV Media & Signage specialise in digital and static signage with over 30 years experience delivering industry leading outcomes to a broad range of loyal customers.

Our team are driven to deliver; innovating to combine cutting edge technology, industry leading creative, quality manufacturing and expert installation for complete visual solutions. Driving our customers' marketing objectives through customisation and personalisation.

Design excellence

We boast a qualified and experienced in-house creative team with experts specialising in graphic design, sign engineering, animation and video production.

Technical expertise

The team offers expert technical advice and support throughout all phases of your signage project including; site auditing, in house manufacturing, professional installation, system integration, network and software management.

Ongoing support

We can assist you with customised content management systems, 24-hour maintenance assistance and preventative and reactive maintenance programs.

CERTIFIED AND ACCREDITED TO GET THE JOB DONE
